SKILLS

- Object-Oriented Programming
- Database Design and Management
- Solving Complex Problems
- Analytical Thinking and Logic
- Ability to learn and adapt
- Collaborative and team-oriented

HOBBIES

- The sciences (math, physics, astronomy)
- Chess, Poker
- Individual or team sports
- Video Games

PROFESSIONAL EXPERIENCE

Full-Stack Developer Internship

SQLI Nantes | April 2026 - June 2026

Development of an interactive quiz app using Angular and Spring Boot, inspired by Kahoot. The app helps energize the workplace and also serves as an engagement tool at various trade shows.

Mission Développeur Freelance

The Shit Bot | March 2023 - August 2023

Complete redesign of the front end of their desktop application using Angular and Electron. Based on new mockups, I rebuilt the entire user interface from scratch to address the usability issues in the previous version.

Social Media Marketing (SMM)

Twitter | July 2022 - January 2023

Development and sale of Python scripts designed to automate the growth of Twitter accounts using fake profiles, by accurately simulating browser HTTP traffic to bypass detection systems.

EDUCATION

BUT Application Development Track

Nantes IUT in Computer Science
Nantes (44000), France
2024-2027

General Baccalaureate with Honors

Sacré Cœur La Salle High School
Nantes (44000), France
